Here at Hawkshead Wines we have commitment and a passion for supporting wineries that produce great wine. But our commitment doesn't stop there, we also recognise that we need to source, promote and encourage wineries that work in harmony with their environment and its people. We already list a broad range of sustainable and ethical wines such as; Fairtrade, Fair for Life, biodynamic and organic. Today we are excited to present a number of new additions to our organic range, alongside some established favourites.

At the heart of organic winemaking is the generating and maintaining of healthy soils, the promotion of the diversity of animals and insects living around the vineyard, and reducing the reliance on chemically based fertilizers, pesticides, fungicides and herbicides. Conventional winemakers may use a number of approved pesticides and herbicides on their grapes, whereas organic winemakers seek more natural remedies to their vineyard challenges. One of the featured wineries, Stellar Organics, uses the novel method of using Indian Runner ducks to patrol the vineyards managing insects, snails and the like!

Enjoy these great wines with Free Delivery when you include six bottles of the featured wines below as part of a twelve bottle order, or save even more with our discounted Six-Bottle Red or White Sampler Cases.
